20cm (8") H

Give your plants the best start in life!

- All in one kit includes base tray, 28 durable plant cells and clear ventilated propagator lid
- Uniquely designed "spilt cells" allow easy inspection of root development and zero root disturbance when plants are removed for transplanting
- Deep cells (12cm) feature internal ridged sides to encourage healthy downward root development
- Each cell features a central drainage hole and 4 side ventilation slots ensuring excellent drainage and beneficial air pruning of the root system
- Ideal for all plants with deep root systems such as beans and sweet peas but equally good for raising cuttings
- Long life injection moulded plant cells and base tray give years of repeated use
- Cells can be easily cleaned & sterilised in a dishwasher after use
